MISSION STATEMENT

We aims to develop the individual talents of young people and teach them to relate the experience of the classroom to the realities of the world outside. Strong emphasis is placed on the ideals of international understanding and responsible citizenship, to the end that KIN students may become critical and compassionate thinkers, life long learners and informed participants in local and world affairs, conscious of the shared humanity that binds all people together while respecting the variety of cultures and attitudes that make for the richness of life.

AIM

Instructing children in learning how to learn and how to evaluate information critically.

GOAL

The goal of education at all levels is to provide young people with the values and opportunities that will enable them to develop sound judgment and choose wisely.

Educating children to go places.

Our philosophy

To create harmony and better understanding among our students so that they will grow up to be stable and respectable pillars of the society. The students are aware of and sensitive to the experiences of others.

Our Mission

To provide a broad based education combining diversity of children enrolled at our school.

Our approach

Our focuses on the development of the whole child, not only in the classroom but also in the world outside the classroom, through other environments where children learn. We offer a framework that meets each individual child’s diverse needs.

Assessment

Teachers and school head assess the students. There are two types of assessment:

Formative	This is interwoven with daily learning and helps teachers and students find out what the students already know in order to plan the next stage of learning. Formative assessment and teaching are directly linked, neither can function effectively or purposefully without the other.
Summative	This happens at the end of the teaching and learning process. It gives the students opportunity to demonstrate what they have learned.
